

**Small Cell RRH Kit  
for ALU AWS 60W Radio**

Cablcon is an ISO 9001 and TL 9000 Certified manufacturer of custom broadband solutions. Formed in 1986, the company has evolved to manufacture fiber optic management solutions, passive fiber optic equipment and high quality copper and fiber assemblies.

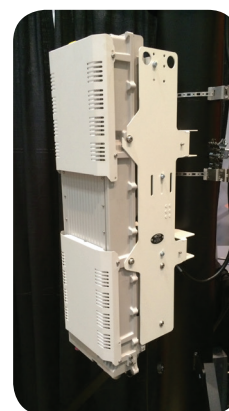

Due to customer requests, Cablcon now offers staging and kitting of our products along with specified distribution items. As a responsive domestic manufacturer with facilities located in both Texas and Michigan, Cablcon specializes in supplying quality products on a quick turn basis, while consistently exceeding 98%+ on time delivery.

**BEFORE**

**AFTER**

The Small Cell RRH Kit is available as listed below, or can be customized to include additional items and services that meet your needs. Services include installation of ground kits on RF 1/2" jumpers, color banding of RF jumpers, custom labeling or packaging, and other services that add value while reducing your installation time and overall costs.

T4148-60AWS-KIT includes the following:

- (1) Multipurpose pole/wall bracket that houses the ALU 60W radio, router and Delta power supply. Consolidates all items into a single bracket, saving space on the pole and reducing recurring costs. Bracket engineered to house multiple radios/configurations also available.
- (2) Cablcon JMA 1/2" Superflex DIN/M to DIN/M PIM & VSWR rated jumpers, 50' length. Jumpers supplied with test labels. Electronic test results are available online at [rf.cablcon.com/client](http://rf.cablcon.com/client) and are archived at Cablcon for warranty purposes.
- (4) JMA straight DIN/M Superflex connectors with weather protection.
- (1) Delta Advantage Outdoor 1kW 48VDC output power module with both AC & DC cables 10'.
- (1) TE FullAXS FOSM Lead, 4.8mm single mode LC-LC/DPX, 1 meter.
